Serving Per Tray

The serving amounts for each Catering tray is a rough estimate. Your final order depends on how big a serving each person will eat as well as how much other food (Appetizers, chips, pretzels, white pizza bites) you will be serving. We suggest you always round up to be sure you will have enough food.

Children 3 to 7 years old can count as half of an adult serving.

Most of the time a teenager will consume twice the amount of food that an adult person will.
